SUMMARY

Front-End Developer with 2 years of experience building responsive, user-centric web applications. Skilled in creating modern, interactive interfaces. Experienced in developing large-scale dashboards and management systems handling millions of records. Strong focus on clean code, performance optimization, and delivering seamless user experiences.

EXPERIENCE

Sep 2025 - Present	StarSphere Front-end Developer - Build and maintain responsive web applications using React and Next.js - Collaborate with designers to implement pixel-perfect UI components - Improve application load time by 40% through code optimization and lazy loading - Ensure cross-browser compatibility and mobile-first responsive design
Jul 2025 - Aug 2025	Lightring Technology Front-end Developer - Developed reusable React components for internal dashboard systems - Integrated RESTful APIs and managed application state with Redux Toolkit - Collaborated with backend team to ensure seamless data flow - Delivered projects on tight deadlines while maintaining code quality
Feb 2025 - Jul 2025	The Golden Castle Front-end Developer - Created interactive user interfaces using React and Tailwind CSS - Implemented responsive designs that increased mobile user engagement by 25% - Conducted code reviews and mentored junior developers - Optimized website performance and improved SEO scores

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript
Front-end: React.js, Vue.js, Next.js, Redux Toolkit, Framer Motion
UI Libraries: Tailwind CSS, Shadcn, Mantine UI, Hero UI
Back-end: Node.js, Nest.js, Express, RESTful API, PrismaORM, Sequelize
Databases: Postgress, MySQL, MongoDB
Tools: Git/GitHub, Postman, Swagger, Apidog
Other: Performance Optimization, Problem-Solving

PROJECTS

Technical Support System — Real-time Customer Communication Management System

- Built and sold as a SaaS real-time support chat application integrated into multiple production platforms
- Integrated with many client support applications as an embedded live chat solution
- Implemented real-time live chat for instant, bidirectional communication between users and agents
- Developed multi-role system (Admin, Supervisor, Agent, Client) with fine-grained permissions and access control
- Managed full ticket and conversation lifecycle with role-based visibility and escalation workflows

Dashboard Entrepreneurship — Ministry of Higher Education

- Built control panel managing 1.5 million+ student and project records
- Implemented role-based permissions and access control system
- Developed project creation and review management workflow
- Created messaging system for communication between students and authorities

Dashboard Riyada — Entrepreneurship Directorate

- Built administrative control panel managing data for 500,000+ users
 - Implemented dynamic user roles and permissions with complete access control
 - Developed flexible management tools for efficient data handling
 - Designed modern UI/UX ensuring smooth performance at scale
-

Dashboard Archive Documents — Baghdad Chamber of Commerce

- Built document archive system managing 85,000+ importer and exporter records
 - Developed dual-panel system with separate interfaces for managers and employees
 - Implemented role-based permissions for secure document access
 - Created user-friendly, responsive interface for efficient document management
-

Hospital System

- Built hospital management system for room scanning and inventory tracking
 - Developed real-time display of rooms, equipment, and item availability
 - Implemented role-based access control for medical staff
 - Created responsive interface for efficient hospital operations
-

Electronic Voting Dashboard

- Built integrated control panel for electronic voting and reporting
 - Developed vote management system with real-time results tracking
 - Implemented secure role-based permissions for administrators
 - Created comprehensive reporting and analytics features
-

Riyada — riyada.iq

- Built landing page for Entrepreneurship Directorate platform
 - Designed modern, responsive interface showcasing platform features
 - Optimized for performance and SEO
-

Karwatt Taxi — karwatt.taxi

- Built landing page for 100% electric taxi application
 - Showcased eco-friendly fleet (Geely RL7 & Tesla) features
 - Designed modern interface highlighting sustainability and smart driving
-

Tajr Platform — tajr.gcc.iq

- Built landing page for import/export document archive system
- Designed interface for Baghdad Chamber of Commerce services
- Showcased platform features for importers and exporters
